Jawahar Navodaya Vidyalaya,Ganjam
Percentage:83.6

PROJECT :

• Voice Assistant

Using various Python modules , data is collected using voice recognition module and processed with Natural language processing. Google API is used to connect with internet.

• Face Detection

Human face is detected and for the average time human was there in screen. It also detects all moving objects and classify them

• Emoji Prediction

This project takes in live video feed and converts the input food to predicted emoji. The keypoints of face, left and right hand are extracted using mediapipe. Then these keypoints are collected as saved as numpy file

ACHIVEMENT

Core member of Club Excel, programming club of NIST. I am in the interview panel for the selection of club members.
